Free Study Guides for THREE Months

During this difficult time we are all facing, it is important, as our President said, to all play our part. With this in mind, Future Managers has taken the step to offer free electronic study guides to all colleges for three months.

Our study guides allow students to study anywhere! During the lockdown and college closures, students can confidently study and navigate their course with the learning roadmap the guide provides, as well as make use of the many online tools such as videos, interactive tests, etc.

Internet access is only required for the initial download, thereafter, the study guides will be available offline (data not required).

Our study guides are available on all platforms (Android, iOS, Windows, PC and laptops).
